Summary

As a Master of Information Experience Design candidate with a background in Industrial Engineering and 6+ years of entrepreneurial experience, I am seeking an internship in software engineering. With a strong foundation in project management, UX research, usability testing, and information architecture, I am proficient in multiple programming languages including Python, PHP, JavaScript, and React. My experience in visual design, prototyping, user flows, and mockups allows me to create intuitive and user-friendly software products. I am eager to apply my technical expertise and design skills to contribute to a software engineering team and further my growth as a software engineer.

Experience

Founder & Director of Sales and Business Development
